PERSONAL PROFILE

An efficient, professional, motivated, reliable and positive individual, with the skills and experience necessary to integrate into a range of diverse environments and always aiming to deliver the highest level of service. I demonstrate a positive response to pressure and I'm competent in completing my work to strict time deadlines. I have a great passion for developing websites and I'm experienced in test automation using selenium. I possess excellent interpersonal and communication skills, good numeric skills, with attention to detail and I'm also quick at learning new things.

SKILLS AND ACTIVITIES

- As part of my 12 weeks training with **JustIT**, I have successfully designed and developed both front-end and back-end applications in Html, CSS, JavaScript, SQLite, Python, Tailwind and Flask.
  Projects:

  - **A Cloned Netflix Website:** Developed using HTML5 | CSS3 | JAVASCRIPT
  - **Random Images Site:** Developed using HTML5 | CSS3 | JAVASCRIPT | API
  - **Random Quotes:** Using HTML5 | CSS3 | JAVASCRIPT | API
  - **Film App: CRUD** app that allows users to manipulate a film database.
    The app was developed in – PYTHON | SQLITE3 | FLASK | HTML5 | CSS3

- As Part of an activity, I always like learning more on already known programming languages and doing things that seems impossible to do. I am currently learning more about Django and React which I believe will be of benefit to me and to any employer.

- Apart from my computing skills, I have also gained a lot of experience working in the retail sector and have mastered important skills like customer relations, telephone manners, communication and many more.
